The International MBA in Entrepreneurship and Innovation is designed to train a select group of students with the knowledge and skills for successfully adapting to emerging business trends. This new program, taught in English, is a joint venture of the Jerusalem School of Business Administration and the Rothberg International School (RIS).

The curriculum includes the development of sustainable business models; financial and data analysis; and current trends in management, entrepreneurship and innovation. Students will acquire tools for creating services and products that are suitable for global markets, while participating in a professional internship. Students will benefit from this unique opportunity to study in Israel, a country widely viewed as a hub of innovation, high-tech firms, and start-ups. In addition, they will gain value beyond the classroom by networking with faculty and exploring the Israeli business world.

MBA in Entrepreneurship and Innovation

Jerusalem

Jerusalem is known for its abundant historical and holy sites as well as its fascinating tourist attractions. A city sacred to Judaism, Christianity and Islam, Jerusalem is a meeting of past and present, of ancient roots and modern innovations. In addition, this thriving metropolis is rich in art galleries and museums, theaters and concert venues, cafes and pubs. Exciting festivals, international conferences, sports competitions, and many other special events are held throughout the year.

Curriculum

The program consists of 48 credits taken over three consecutive semesters (autumn, spring and summer).

Required courses (22 credits) focus on the following areas:

- Finance
- Accounting
- Marketing
- Organizational Behavior
- Business Strategy
- Entrepreneurship
- Quantitative Models

Elective courses (18 credits) are offered in the following clusters:

- Entrepreneurship and Innovation (e.g., Startups and Innovation: The Israeli Model, New Product Policy)
- Global Aspects of Finance (e.g., Stock Markets and Financial Systems Around the World, Business Markets and Economic Growth in East Asia)
- Globalization and Management (e.g., Organizational Change, Leadership Development in Organizations)

Professional Internships

Students benefit from a supervised internship (8 credits) in a leading high-tech company, consulting firm or start-up.

Admission Requirements

Qualified candidates with a Bachelor’s degree from an accredited institution of higher education may apply.

- A minimum 3.2 grade-point average (82/100) or the equivalent
